### Notes:

- ❖ The cluster (4dctog) is worked with 3 dc around the stem of the previous dc and one in the indicated stitch. This post from Moogly shows the method of wrapping the stitches around the stem of the stitch. <http://www.mooglyblog.com/wrap-around-stitches/>
- ❖ The 4dctog is worked leaving the last loop of each dc on the hook and then pulling through all 5 loops on the hook to finish the stitch.
- ❖ The crown of the beanie is worked in alternating front and back loops. One stitch is worked in the front loop and the next is worked in the back loop. For increase stitches, work both loops individually.
- ❖ For a slouchier beanie, do 2-3 more rounds of the cluster stitch.
